

Immersive Agritourism & Education

Celestial Falls Agripark

Planting Seeds of Knowledge: Experience the Farm Firsthand

At Celestial Falls Agripark, education is not confined to a classroom; it is alive, breathing, and waiting to be discovered in every acre of our 1,185-acre property. We believe that the best way to understand the natural world is to immerse oneself in it. Our Agritourism & Education programs are designed to spark curiosity, foster a deep respect for agriculture, and reconnect guests with the sources of their food and the rhythms of nature.

The Living Classroom: Core Amenities

Before diving into our structured programs, guests are invited to explore the two beating hearts of our agricultural mission.

- **The 10-Acre Teaching Garden:** More than just a scenic backdrop, our massive 10-acre garden is a fully functioning ecosystem designed for guest interaction. Here, visitors can learn about sustainable farming practices, composting, and the lifecycle of plants. Guests can enjoy fresh produce during their stay or purchase a "Harvest Basket" to take a taste of the farm home with them.
- **Farm Animal Interactions:** Spanning 100 dedicated acres, our animal sanctuary features specialized shelters and pens that allow for safe, up-close encounters. Guests can meet our resident farm animals, participate in feeding times, and learn about ethical livestock care from our knowledgeable staff. It is a place of joy and learning for animal lovers of all ages.

Passport to Discovery Programs

Turn your visit into an educational adventure with our signature Passport Programs. These curriculums allow young guests to "level up" their knowledge and earn rewards as they explore the park.

- **Little Farmers Passport (Ages 3-6):** Focused on sensory experiences and simple joys, Little Farmers engage in activities like identifying animal sounds, planting seeds in the garden, and meeting Nova the Firefly. Completing the passport earns a certificate and a special treat from the camp store.
- **Junior Farmers Passport (Elementary):** This program dives deeper into the mechanics of farm life. Junior Farmers learn about animal husbandry, understand the basics of harvesting, and participate in daily chores. It is a hands-on lesson in responsibility and sustainability.

- **Junior Explorer Passport (Adventure Focus):** Taking learning into the wild, Junior Explorers utilize our vast trail network to identify native Kentucky trees, spot wildlife tracks, and learn "Leave No Trace" principles. Perfect for budding naturalists exploring our ridges and creeks.

Group Learning Expeditions

Celestial Falls Agripark is the premier destination for group learning, offering customizable itineraries that blend fun with educational standards.

- **School Field Trips:** We transform our Education Barn into a living laboratory. Curriculums can be tailored to match grade-level standards in science and biology, allowing students to dissect pond ecosystems or study soil composition. We offer half-day and full-day packages that include lunch and guided tours.
- **Scout Trips & Merit Badge Workshops:** We welcome scout troops for day trips or overnight primitive camping. Our diverse terrain is ideal for earning badges in Hiking, Forestry, Animal Science, and Nature. Expert-led workshops ensure scouts gain practical skills while enjoying the great outdoors.

Join us to cultivate a new generation of stewards for our land. Education happens naturally at Celestial Falls.
